Finn’s Global Explorer Fact-File

Learning objective: To identify and describe the location of the world's seven continents and five oceans.

Join Finn the dolphin on his latest expedition! Use your atlas or classroom globe to research the world's major geographical features. Fill in each section of this fact-file to help Finn map out his next journey across the globe. Write in full sentences and ensure you use capital letters for the names of continents and oceans.

Word bank: Equator · Northern Hemisphere · Southern Hemisphere · Arctic · Antarctic · Pacific · Atlantic · Indian · Southern · Landmass

1. The Seven Continents: List all seven continents and describe one interesting geographical feature found in a continent of your choice. (4 marks)

2. The Five Oceans: Name the five oceans of the world. Which of these is the largest, and which one is located closest to the North Pole? (3 marks)

3. Hemisphere Fact: Explain the difference between the Northern Hemisphere and the Southern Hemisphere. How does the Equator help us divide the Earth? (3 marks)

4. Ocean Exploration: If Finn were to swim from the United Kingdom across the Atlantic Ocean, which continent would he arrive at first? (2 marks)

5. Climate Comparison: Why do you think the climate is so different in the Antarctic compared to the continent of Africa? Consider their positions on the globe. (3 marks)

Extension challenge: Choose one continent and research its main climate zones. Create a travel brochure for Finn, explaining what clothes he would need to pack if he visited that continent during their summer season.
