Finn’s Global Trade Adventure

Jump on board with Finn the Dolphin as we map out how the world trades!

- **An export is a product or service produced in one country and sold to another country.**
- **An import is a product or service brought into a country from abroad to be sold.**
- **Trade happens because different countries have different natural resources, climates, and skills.**
- **When we trade, we use different currencies, such as the Pound Sterling (£), the Euro, or the US Dollar.**
- **A supply chain is the entire journey a product takes from the raw materials to the finished item in a shop.**

> *Did you know? Did you know? Every day, massive container ships travel thousands of miles across our oceans to deliver goods. Some ships are so large they can carry over 20,000 containers filled with everything from bicycles to bananas!*

Key vocabulary: Export · Import · Globalisation · Supply Chain · Currency · Trade Agreement
