South America: A Continent of Wonders

Join Finn the Dolphin on a grand expedition across the vast landscapes of South America!

- **The Andes mountain range stretches along the western coast of the continent, forming the longest continental mountain range in the world.**
- **The Amazon Rainforest, often called the 'lungs of the planet', produces a significant portion of the world's oxygen and houses millions of unique species.**
- **South America is home to diverse climates, ranging from the arid Atacama Desert to the icy peaks of the southern glaciers.**
- **The continent is divided into twelve independent countries and one overseas territory, with Spanish and Portuguese being the most widely spoken languages.**
- **Major urban centres like São Paulo and Buenos Aires are hubs of culture and trade, showing how human geography has shaped the continent's development.**

Did you know? Did you know that the Amazon River carries more water than any other river in the world? It is so wide in some places that during the wet season, you cannot even see the other side of the bank!
