Kit’s Clever Computing: Staying Safe Online

Learning objective: I can identify how to stay safe, kind, and responsible when using the internet.

About 15 minutes. Grown-up tip: Read these cards together and talk about how your child can come to you if they ever see something online that feels wrong.

Read the front of the flashcard to see the question. Think about what Kit the Fox would suggest, then check the answer on the back. Example: 'What is a password? | Answer: A secret code that keeps your private accounts safe from others.'

What should you do if an online message makes you feel worried or sad?	**What is a 'strong' password?**
Tell a trusted adult immediately, like a teacher or a parent.	A secret code that is hard for others to guess and uses letters, numbers, and symbols.
Should you share your home address or school name online?	**What is a 'stranger' online?**
No, keep all personal information private to stay safe.	Someone you do not know in real life, even if they seem friendly on a screen.
How should you treat people when you are playing games online?	**Why should you never share your login details with friends?**
Always be kind and respectful, just like you would in the playground.	Because your account is personal and it keeps your information safe.
What does it mean to 'block' a user?	**If a game or website asks for your real name, what should you do?**
It stops a person from being able to send you messages or contact you.	Check with an adult before typing in any information about yourself.
What is the 'Golden Rule' of the internet?	**Who is a 'trusted adult' you can talk to about internet safety?**
If you wouldn't say it or do it face-to-face, do not do it online.	A parent, carer, teacher, or any adult who looks after you.
