Discovering Asia: The World's Largest Continent

Join Finn the Dolphin on an epic journey across the vast landscapes of Asia!

- **Asia is the largest continent on Earth, stretching from the frozen Arctic Circle in the north to the tropical islands near the equator in the south.**
- **The continent features extreme topography, including the Himalayas, which contain the world's highest peaks, and vast, arid deserts like the Gobi.**
- **Many regions in Asia experience a monsoon climate, where seasonal wind shifts bring heavy rainfall that is vital for farming crops like rice.**
- **Asia is home to some of the world's most densely populated cities, where modern technology meets ancient cultural traditions.**
- **The continent is surrounded by three major oceans: the Arctic to the north, the Indian to the south, and the Pacific to the east.**

Did you know? Did you know? Asia is so vast that it covers approximately 30% of the Earth's total land area and is home to nearly 60% of the entire human population!
