Mapping Our World with Finn the Dolphin

Learning objective: To identify and illustrate the difference between physical and human geographical features.

Follow Finn the Dolphin's guide to create a landscape map. Use the word bank to label your drawing, ensuring you show both natural features and things built by people.

Draw: Create a landscape map showing a coastal area. Include at least two physical features (natural) and two human features (man-made). Use clear lines and neatly print your labels from the word bank pointing to the correct items in your drawing.

Label words: River · Mountain · Bridge · Forest · Road · Houses · Beach

Steps:

1. Step 1: Draw a large mountain range on one side of your paper and a winding river flowing towards the sea. Label these as 'Physical Features'.
2. Step 2: Draw a small village with three houses and a road connecting them. Label these as 'Human Features'.
3. Step 3: Draw a bridge going over your river. Is a bridge a physical or human feature? Why?
4. Step 4: Find one physical feature in your drawing and colour it green. Write the name of the feature here.
5. Step 5: Explain in your own words what makes a feature 'human' rather than 'physical'.
