

Geometry Drawing Activity

Learning objective: To understand and visualize different shapes and angles in geometry.

Draw a scene using the shapes and angles provided in the word bank. Label each shape with its name and describe the angles you have drawn.

Draw: Step 1: Draw a large square in the middle of the page.

Step 2: Draw a triangle on one side of the square.

Step 3: Draw a circle inside the square.

Step 4: Draw a rectangle above the square.

Step 5: Draw a pentagon on the opposite side of the square.

Step 6: Label each shape with its name.

Step 7: Describe the angles you have drawn in the shapes.

Label words: triangle · square · circle · rectangle · pentagon · right angle · acute angle · obtuse angle

Steps:

1. What is the difference between a right angle and an acute angle?
