

Exploring Magnificent Europe with Finn the Dolphin

Dive into discovery and map out the wonders of Europe!

- Europe is one of the world's seven continents and is located entirely in the Northern Hemisphere.
- The continent is bordered by the Arctic Ocean to the north, the Atlantic Ocean to the west, and the Mediterranean Sea to the south.
- Europe is home to many different countries, each with its own unique culture, language, and capital city.
- Many European countries use the Euro as their currency, though some, like the United Kingdom, use the Pound Sterling (£).
- Major mountain ranges, such as the Alps, act as natural boundaries between different countries across the continent.
- Finn the dolphin loves to visit Europe's long, winding coastlines, which are famous for their beautiful ports and harbours.

Did you know? Did you know? Europe is the only continent that does not have any deserts! From the frozen Arctic circle in the north to the sunny Mediterranean shores in the south, the climate changes greatly as you travel across the land.
