

Addition Adventure Quiz

Learning objective: To practice and test knowledge of addition within 100.

Answer these questions to see how well you can add numbers together.

Great job, Max the monkey! Today, we're practicing addition and finding the sum of different numbers. Remember, when we add numbers, we find out how much we have in total.

Word bank: addition · sum · plus · equal

1. What is $23 + 35$? (2 marks)

2. Is $45 + 27$ equal to 62? (1 mark)

3. True or False: $50 + 50 = 100$ (1 mark)

4. What is $15 + 30$? (2 marks)

5. Add $90 + 10$, what's the sum? (2 marks)

6. Is $40 + 20 = 60$? (1 mark)

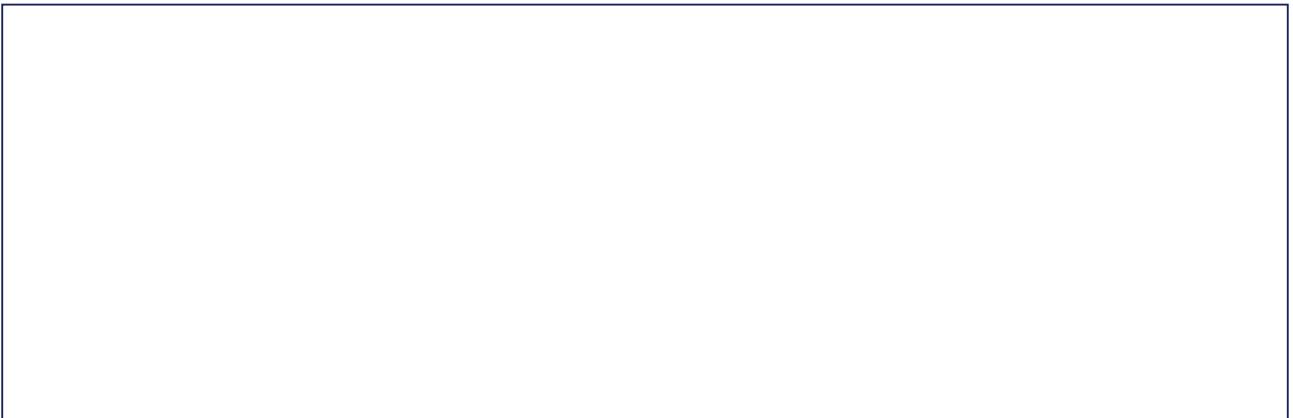

7. What is 18×22 ? (2 marks)

8. Add $33 + 57$, what number do you get? (2 marks)

9. Is $34 + 66$ equal to 100? (1 mark)

10. What is $55 + 45$? (2 marks)

Draw: Draw a picture of Max the monkey solving an addition problem in his treehouse.

Extension challenge: Try to create your own addition problem and solve it. How about $34 + 27$? Can you find the sum?
