

## Finn's Global Trading Adventure

Pack your bags and set sail! Discover how the world stays connected through the magic of trade.

- **An export is a good or service sent out of a country to be sold in another country.**
- **An import is a good or service brought into a country from abroad to be sold or used.**
- **Countries trade because they have different natural resources, such as gold, oil, or fertile soil for farming.**
- **Global trade helps countries build strong relationships and helps people access things they cannot produce themselves.**
- **Shipping containers are used to move goods across oceans on massive cargo ships to keep the supply chain moving.**

*Did you know? Did you know? The UK is one of the world's largest traders! We export high-quality machinery and cars, while we import delicious fruits and vegetables like bananas and tomatoes that cannot grow easily in our cooler British climate.*

**Key vocabulary: Import · Export · Global Trade · Supply Chain · Economy · Natural Resources**
