

Ellie's Roman Empire Expedition

Step back in time and uncover the secrets of the mighty Romans!

- The Roman army was organised into large groups called legions, led by highly trained soldiers known as centurions.
- Romans introduced advanced plumbing to Britain, building incredible aqueducts to transport fresh water into their bustling towns.
- Wealthy Roman families lived in luxurious villas decorated with intricate floor mosaics made from thousands of tiny coloured stones.
- The Romans founded many famous British cities, such as Londinium (London) and Aquae Sulis (Bath), which became key centres for trade.
- Roman social life revolved around the public bathhouse, where citizens went to exercise, wash, and discuss the latest news of the empire.

Did you know? Did you know? The Romans were master engineers! They built a network of over 50,000 miles of straight, stone-paved roads across their empire, many of which are still buried beneath our modern British motorways today.
