

Max's Shape Adventure

Learning objective: To recognise and name 2D shapes (circle, square, triangle, rectangle) in the environment.

Look at the picture and find all the shapes. Use your favourite colours to make the scene bright and beautiful. See if you can spot the hidden shapes in the objects!

Colour this: A friendly scene featuring Max the monkey standing in a garden. Max is holding a magnifying glass. The scene includes a small house with a square window and a triangular roof. There is a large round sun in the corner of the sky, a rectangular garden gate, and some round flowers on long stems. The lines should be bold and clear for colouring, with distinct 2D shapes making up the objects.

Steps:

1. Find the square window on the house and label it 'Square'.
2. Find the round sun in the sky and label it 'Circle'.
