

Max the Monkey's Shape Safari

Join Max the Monkey on a mission to spot shapes all around our classroom!

- A square has four sides that are all the same length and four corners.
- A triangle has three sides and three corners.
- A sphere is a 3D shape that is perfectly round like a ball.
- A rectangle has four corners, but its opposite sides are the same length.
- A cylinder has two flat circular faces and a curved surface.
- A pyramid has a flat base and triangular sides that meet at a point.

Did you know? Did you know? A circle has no corners at all, which makes it perfect for rolling! Meanwhile, a cube has six flat faces that are all the same square shape.
