

Max's Magnificent Measurement Day

Learning objective: To understand and compare the height and length of objects using non-standard units and basic estimation.

Help Max the monkey solve his measurement puzzle! Look at the objects in the picture, colour them in, and then answer the questions below to show what you have learned about measuring.

Colour this: A friendly monkey named Max stands in a garden. Max is holding a ruler. Next to him, there is a tall sunflower, a short mushroom, a wooden fence, and a row of five building blocks lined up on the grass. The sun is shining in the corner. Draw clear, bold outlines for children to colour. Ensure the sunflower is significantly taller than the mushroom to allow for easy comparison.

Steps:

1. Label the tallest object in the picture.
2. Label the shortest object in the picture.
