

Learning About Islam with Ellie the Elephant

Learning objective: To learn about the significance of the crescent moon and star in Islam and recognise symbols of peace and community.

Colour in the picture and learn about the symbols of Islam. Use your favourite colours to make the crescent moon and star shine brightly!

Colour this: A large, friendly, bold-lined illustration of a crescent moon and a five-pointed star sitting in a night sky filled with small, twinkling dots. Below the moon, draw a simple outline of a mosque with a round dome and a tall, thin tower called a minaret. In the corner, draw Ellie the Elephant looking up at the sky with a gentle smile, holding a book. The lines should be thick and clear for little hands to colour within.

Steps:

1. Label the crescent moon in your picture.
2. Label the star in your picture.
