

Nova's Material Hunt

Learning objective: To identify and name everyday materials including wood, metal, plastic, and glass.

Look at the objects Nova has found in the garden. Colour the items and think about what they are made of. Can you draw a line to label the different materials?

Colour this: A large, friendly barn owl named Nova wearing a small explorer's vest, standing in a sunny garden. In front of her are four distinct objects: a sturdy wooden bench, a shiny metal watering can, a transparent glass jar, and a bright red plastic bucket. The background features simple outlines of trees and flowers. The lines should be bold and clear for easy colouring. Ensure the textures of the wood (grain lines), metal (shiny circles), and glass (reflective highlights) are suggested by simple line art.

Steps:

1. Label the wooden table in your picture.
2. Label the metal watering can in your picture.

3. Label the glass jar in your picture.
