

Discovering Africa with Finn the Dolphin

Pack your bags and dive into an adventure across the vast continent of Africa!

- Africa is surrounded by two mighty oceans: the Atlantic Ocean to the west and the Indian Ocean to the east.
- The Equator runs right through the middle of Africa, meaning many parts of the continent have a warm climate all year round.
- The Sahara Desert, located in North Africa, is the largest hot desert in the entire world, stretching across many different countries.
- The River Nile, often cited as the longest river on Earth, flows northwards through Africa before reaching the Mediterranean Sea.
- Africa is home to the savanna, a vast tropical grassland where iconic animals like lions, elephants, and zebras roam freely.

Did you know? Did you know? Africa is the second-largest continent in the world! It is so big that it contains 54 different countries, each with its own unique cultures, languages, and traditions.
