

Finn's Biome Adventure

Learning objective: To identify and describe the characteristics of different global biomes.

Join Finn the dolphin on a journey across the world! Read each question carefully and circle your answer or write it on the line provided.

Answer Key: 1. A (Tropical Rainforest), 2. True, 3. False (It is a cold biome), 4. C (Desert), 5. Deciduous, 6. False (They are found in many places), 7. Equator, 8. True, 9. Tundra, 10. B (Grassland).

Word bank: Tundra · Desert · Tropical Rainforest · Grassland · Deciduous Forest · Equator

1. Which biome is found near the Equator and is known for having high rainfall all year round? A) Tropical Rainforest* B) Tundra C) Desert D) Polar (1 mark)

2. True or False: A biome is a large area of land with a specific climate, plants, and animals. (True/False) (1 mark)

3. True or False: The Tundra is a very hot and dry biome. (True/False) (1 mark)

4. Which biome receives less than 25cm of rain per year? A) Deciduous Forest B) Grassland C) Desert* D) Tropical Rainforest (1 mark)

5. In which type of forest do trees lose their leaves every autumn? (One word answer) (1 mark)

6. True or False: All biomes have the exact same weather all year round. (True/False) (1 mark)

7. What is the name of the imaginary line that circles the middle of the Earth, where many hot biomes are located? (1 mark)

8. True or False: Animals in the desert have special adaptations to survive with very little water. (True/False) (1 mark)

9. Which cold, treeless biome is known for having a layer of permanently frozen ground called permafrost? (1 mark)

10. 10. Which biome is made up mostly of tall grasses and very few trees? A) Tundra B) Grassland* C) Rainforest D) Ocean (1 mark)

Draw: Draw a picture of your favourite biome. Make sure you include at least two animals and two types of plants that would live there naturally.

Extension challenge: Choose one biome and write a short paragraph explaining why it would be difficult for a polar bear to live there.
