

Finn's Rainforest Adventure

Learning objective: To identify and explore the features of a rainforest environment.

Look at the picture of the rainforest. Use your brightest crayons to colour in the tall trees, the winding river, and the animals. When you have finished, use the labels at the bottom to identify the parts of the rainforest.

Colour this: A friendly dolphin named Finn wearing a small explorer's hat, peeking out from a wide, winding river that snakes through the centre of the page. Surrounding the river are three very tall, thick-trunked tropical trees with large, broad leaves. On one of the branches, there is a colourful parrot sitting. In the background, draw some large, fern-like plants and a bright sun peeking through the canopy. Use bold, clear outlines suitable for colouring.

Steps:

1. Label the tall tree in your picture.
2. Label the winding river in your picture.
3. Label the friendly dolphin, Finn, in your picture.
