

Finn's Guide to a Sustainable Future

Be a Planet Protector: Small Changes, Big Impact!

- **Sustainability is about meeting our current needs without stopping future generations from meeting theirs.**
- **Renewable energy comes from sources that do not run out, such as wind, solar, and water power.**
- **Reducing, reusing, and recycling helps to lower the amount of waste that ends up in landfills.**
- **Buying local produce reduces the distance food travels, which lowers the carbon footprint of your shopping basket.**
- **Conserving water by turning off the tap while brushing your teeth saves precious resources every single day.**
- **Protecting biodiversity ensures that all living creatures have the healthy habitats they need to thrive.**

Did you know? Did you know? Finn the dolphin loves clean oceans! Sustainability means using natural resources, like water and wood, in a way that makes sure there is still plenty left for future generations to enjoy.

Key vocabulary: Sustainability · Renewable · Conservation · Carbon footprint · Biodiversity · Recycle
