

Exploring the Regions of the United Kingdom

Join Finn the Dolphin on a grand tour of our beautiful British Isles!

- The United Kingdom is divided into four distinct nations: England, Scotland, Wales, and Northern Ireland, each with its own unique history and geography.
- The Highlands of Scotland are famous for being mountainous and sparsely populated, whereas the South East of England is largely low-lying and densely urbanised.
- Wales is renowned for its dramatic landscapes, including the Cambrian Mountains and the beautiful, rugged coastline of Pembrokeshire.
- Northern Ireland features the unique Giant's Causeway, a natural wonder formed by ancient volcanic activity resulting in thousands of interlocking basalt columns.
- The climate in the UK is influenced by the Atlantic Ocean, generally leading to milder winters and cooler summers than other countries at similar latitudes.

Did you know? Did you know? The United Kingdom is not just one big island! It is made up of over 6,000 smaller islands in addition to the main landmasses of Great Britain and part of Ireland. Finn the Dolphin loves visiting the rugged coastline of the Scottish Hebrides, where the water is clear and cool!
