

Nova's Space Adventure: The Story of Neil Armstrong

Reach for the stars and discover the journey of a true space explorer!

- Neil Armstrong was a brave astronaut who travelled to the Moon in a giant rocket.
- In 1969, Neil Armstrong became the very first person to walk on the Moon's surface.
- He wore a special white space suit to keep him safe while he explored the dusty grey ground.
- Neil Armstrong worked with a big team of people to make his special mission possible.
- When he returned to Earth, he became a hero for showing the world that humans could visit space.
- Learning about Neil Armstrong helps us understand how far people have travelled in history.

Did you know? Did you know? When Neil Armstrong stepped onto the Moon, he left a footprint in the dust. Because there is no wind on the Moon, that footprint is still there today!
