

Max's Magical Addition Station

Jump into addition with Max the monkey and make your maths totals grow!

- Addition is when we add two or more numbers together to find the total sum.
- The plus sign (+) shows us that we are joining two amounts together.
- The equals sign (=) tells us what the final total is.
- When we see the word 'altogether', it is a clue that we need to use addition.
- If Max has £2 and finds £3 more, he has £5 in his pocket altogether.

Did you know? Did you know? Addition is like building a tower of blocks. When you put two separate towers together, you get one big, taller tower! This is exactly how Max works out his fruit totals in the jungle.

Key vocabulary: addition · plus · equals · total · sum · altogether
