

Max the Monkey's Market Maths

Learning objective: To practise simple addition by counting groups of objects up to 10.

Help Max the Monkey count the fruit at the market! Count the items in each basket, write the total in the circle, and colour in the picture.

Colour this: A large, friendly monkey named Max wearing a small apron standing behind a market stall. On the left side of the stall are 3 large, round apples. On the right side of the stall are 2 long, curved bananas. In the centre of the stall, draw a large empty circle for the total sum. Below the stall, draw a small sign that says 'Total: £5' to show the price. Provide clear, bold outlines for the fruit and the monkey for easy colouring.

Steps:

1. Label the basket of apples in your picture.
2. Label the basket of bananas in your picture.
