

Bea the Bee's Material Hunt!

Look around and see what everything is made of!

- **Wood comes from trees. Can you find something in the room made of wood?**
- **Glass is see-through and smooth. We use it for windows so we can look outside.**
- **Plastic can be hard or squashy. Many of our favourite toys are made of plastic.**
- **Fabric is soft and bendy. We use fabric to make our clothes and blankets.**
- **Metal is usually hard and shiny. We use metal to make spoons for our dinner.**

Did you know? Did you know? Even though a key and a coin are both made of metal, they have different jobs! Metal is very strong and can be shaped into lots of different things.

Key vocabulary: Plastic · Metal · Wood · Glass · Fabric · Hard · Soft · Smooth · Rough
