

Bea's Beautiful Garden

Learning objective: To identify and name the basic parts of a plant and understand how they grow.

Help Bea the honeybee explore the garden! Colour in the plant and use the labels to show the different parts. Talk to a grown-up about what plants need to grow big and strong.

Colour this: A large, friendly-looking sunflower in the centre of the page with a thick stem and two large leaves. There are roots visible underground at the bottom of the page. Bea the honeybee is flying near the top of the flower, smiling. The background shows a simple, bright sun in the corner and a few fluffy clouds. Use thick, clear outlines suitable for young children to colour within.

Steps:

1. Label the root at the bottom of the plant.
2. Label the leaf on the stem.
3. Label the flower at the top.
