

Springtime with Bea the Honeybee

Learning objective: To observe and identify the signs of spring and understand the role of bees in the natural world.

Look at the picture and listen to the fun facts about spring. Colour in the scene using bright, happy colours. Can you spot Bea the Honeybee flying near the flowers?

Colour this: A friendly, simple line drawing of a garden scene. In the centre, there is a large, smiling honeybee named Bea with soft, rounded wings. Surrounding Bea are three different types of spring flowers with thick, bold outlines for easy colouring: a tall tulip, a small daisy, and a daffodil. In the corner, there is a round sun with a smiling face and a few fluffy clouds. Include a small patch of grass with a few tiny ladybirds at the bottom of the page.

Steps:

1. Label the flower in your picture.
2. Label the bee in your picture.
