

Zara's Perspective Art Quiz

Learning objective: To understand how artists use perspective to show depth and distance in 2D drawings.

Hello! I am Zara the zebra. I love finding patterns and depth in art. Use this quiz to test your knowledge about perspective. Use the word bank at the bottom if you get stuck!

Answer Key: 1. B, 2. True, 3. Vanishing point, 4. A, 5. True, 6. Smaller, 7. B, 8. False, 9. Closer, 10. True

Word bank: Horizon · Vanishing point · Smaller · Closer · Depth

1. 1. What do we call the imaginary line where the sky meets the land? A) Top line B) Horizon* C) Bottom line D) Middle line (1 mark)

2. 2. True or False: Perspective helps an artist make a flat drawing look like it has space. (1 mark)

3. 3. What is the name of the single point where all parallel lines seem to meet in the distance? (1 mark)

4. 4. If an object is very far away, does it look: A) Smaller* B) Larger C) Brighter D) Faster (1 mark)

5. 5. True or False: Objects that are closer to us usually appear lower down on the page. (1 mark)

6. 6. Fill in the blank: As objects move away from us, they get _____. (1 mark)

7. 7. Which tool do we use to draw straight lines to the vanishing point? A) A brush B) A ruler* C) A sponge D) A crayon (1 mark)

8. 8. True or False: Perspective is only used for drawing buildings. (1 mark)

9. 9. Fill in the blank: Objects that are _____ to the viewer appear larger and clearer. (1 mark)

10. 10. True or False: You can use perspective to show 'depth' in a picture. (1 mark)

Draw: Draw a long, straight road that starts wide at the bottom of your page and gets _____ thinner as it reaches the middle of the page. Draw a dot in the middle to show where the road disappears!

Extension challenge: Look out of your classroom window. Can you spot two things that are far away? How do they compare in size to things right next to you?
