

Kit's Computing Survey: Data Handling

Learning objective: To collect and organise data into a tally chart and interpret the results.

Help Kit the fox organise his library data! Choose a question to ask your friends (e.g., 'What is your favourite fruit?'). Record their answers in the tally chart box. Then, use your data to answer the questions below. Use the word bank to help you write your sentences.

Word bank: tally · data · total · most · least · favourite · information

1. My survey question is: (Write the question you asked your friends) (1 mark)

2. Tally Chart: (Draw your tally marks here to show the results) (2 marks)

3. Which option was the most popular? (Sentence starter: The most popular option was...) (2 marks)

4. What is the total number of people you asked? (Sentence starter: The total number of people is...) (2 marks)

5. Why is it useful to put data into a chart? (Sentence starter: It is useful because...) (2 marks)

Extension challenge: Can you draw a simple bar chart using the total numbers from your tally chart?
