

Kit's Computing Challenge: Organising Data

Learning objective: To understand how to collect and organise data using a simple tally chart or table.

Help Kit the fox sort out his favourite items. Read the questions below and use the sentence starters to write your own data report.

Kit the fox wanted to find out which snack his friends liked best to eat during their picnic.

Word bank: firstly · then · in total · most popular · least popular · the data shows · because · tally

1. What did you choose to count for your data collection? Start your sentence with: I decided to collect data about... (2 marks)

2. How did you record your information? Start your sentence with: I used a tally chart because... (2 marks)

3. Which item had the highest number? Start your sentence with: The most popular item was... (2 marks)

4. What does your data tell us? Start your sentence with: My data shows that... (2 marks)

Extension challenge: Can you draw a simple bar chart to show your results? Remember to give your chart a title!
