

Kit's Computer Network Adventure

Learning objective: To understand that a network is a group of computers connected together to share information.

Kit the fox is building a network to share files! Look at the diagram below. Match the computer part to its job. Draw a line from the part on the left to the correct job on the right.

Word bank: Server · Network · Connected · Information · Computer

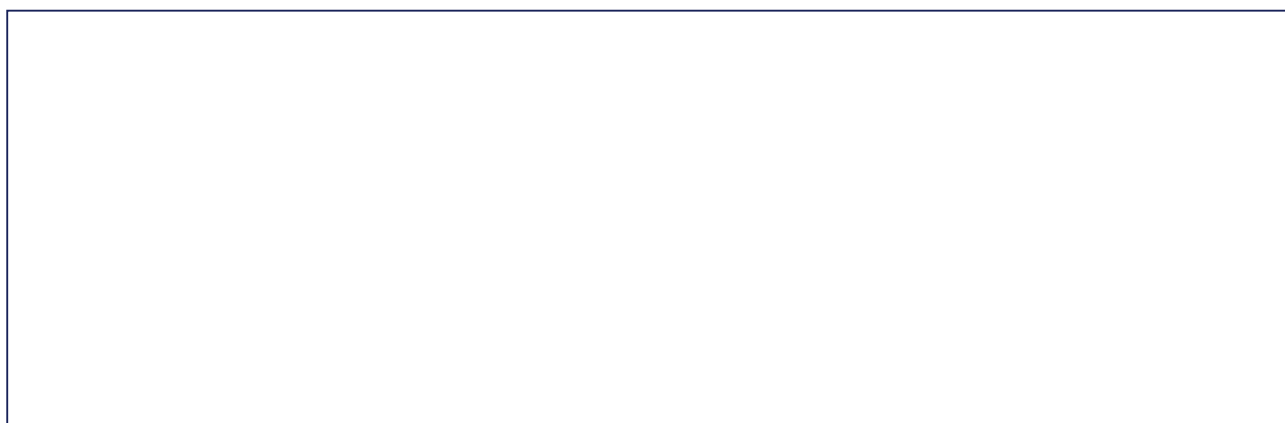

1. 1. A _____ is a group of computers linked together to talk to each other. (1 mark)

2. 2. When computers are _____, they can share games and pictures. (1 mark)

3. 3. The _____ is a powerful computer that stores all the files for the others to use. (1 mark)

4. 4. Why do we use a network? (Sentence starter: We use a network to...) (2 marks)

Draw: Draw a picture of three computers connected to one central server by using straight lines to show the network cables.

Extension challenge: Imagine your classroom is a network. If you want to send a message to a friend, how could you show that with a piece of string? Try it with a partner!
