

Detective Pip's Inference Mystery

Learning objective: To make inferences based on visual clues to understand what is happening in a scene.

Look closely at the scene below. Use your detective skills to think about why Pip is wearing a raincoat and holding an umbrella, even though the sun is shining. Colour the picture and answer the questions to solve the mystery!

Colour this: A line-art illustration of Pip the caterpillar standing in a sunny garden. Pip is wearing a bright yellow raincoat and a pair of yellow rain boots. He is holding a large, open umbrella. In the background, there is a clear blue sky with a big, smiling sun, but in the distance, a small, dark grey cloud is peeking over a garden fence. There are flowers and blades of grass around Pip's feet for children to colour.

Steps:

1. Label the clue in the picture that suggests it might rain later.
2. Based on what Pip is wearing, what can you infer about the weather forecast for later today?
