

Finn's Amazing World Map

Dive into discovery with Finn the Dolphin! Explore our big, blue world.

- There are seven large areas of land on Earth called continents. They are Asia, Africa, North America, South America, Antarctica, Europe, and Australasia.
- The Pacific Ocean is the largest and deepest ocean on our planet.
- Antarctica is the coldest continent and is found at the very bottom of the world.
- The five oceans are the Pacific, Atlantic, Indian, Southern, and Arctic oceans.
- Asia is the largest continent in the world, covering about one-third of all the land.

Did you know? Did you know? Even though we call them different oceans, all of the water on our planet is actually connected! It is one giant, global ocean that covers about 70% of the Earth's surface.
