

North America: A Continent of Wonders

Join Finn the Dolphin on an epic voyage across the vast lands of North America!

- North America is the third-largest continent in the world, stretching from the Arctic Ocean in the north to the Isthmus of Panama in the south.
- The Rocky Mountains are a massive range that runs through western North America, acting as a giant barrier for weather systems moving across the land.
- The continent is home to three enormous countries: Canada, the United States of America, and Mexico, plus many vibrant nations in Central America and the Caribbean.
- The Great Lakes, located on the border between Canada and the USA, contain roughly one-fifth of the world's surface fresh water.
- North America's geography includes diverse biomes such as vast grasslands, arid deserts, dense coniferous forests, and bustling coastal cities.

Did you know? Did you know? North America is the only continent that spans every single climate zone on Earth, from the icy, frozen tundra of the Arctic Circle to the hot, humid tropical rainforests in the south!
