

Finn's Global Trading Adventure!

Follow the journey of your favourite things from across the globe!

- Trade is when people buy, sell, or swap goods and services with each other.
- To 'import' means to bring goods into our country from another country.
- To 'export' means to send goods from our country to sell somewhere else.
- Goods travel across the world using planes, trains, lorries, and huge ships.
- When we buy a banana at the shop for £0.30, it has often travelled thousands of miles to get there!

Did you know? Did you know? Finn the dolphin loves watching giant cargo ships travel across the ocean! These ships carry thousands of metal containers filled with clothes, toys, and food to help people get the items they need from far away.

Key vocabulary: Trade · Import · Export · Goods · Transport · Market
