

Max's Easter Egg Hunt

Learning objective: To practise counting and simple addition within 10 in a festive context.

Help Max the monkey count his Easter basket! Colour the eggs and solve the maths puzzles below.

Colour this: A friendly monkey character named Max is sitting in a grassy garden. Next to him is a large wicker basket. Inside the basket, draw 5 distinct Easter eggs of different shapes (some oval, some round). Some eggs should have patterns like spots, stripes, or zig-zags. Surrounding the basket, draw 3 small flowers and a butterfly. The scene should be clear, with bold outlines for children to colour in.

Steps:

1. Max found 3 spotted eggs and 2 striped eggs. How many eggs are there altogether? Write the number here:
2. Label the largest egg in the basket with the letter 'L'.
