

Max's Fraction Picnic

Learning objective: To recognise, find and name a half and a quarter as one of two or four equal parts of an object or shape.

Max the monkey is getting ready for a picnic! Colour in the fractions as shown in the picture. Remember, for a fraction to be equal, both sides must be the same size.

Colour this: A friendly monkey named Max sitting on a picnic blanket. In front of him is a picnic spread: 1) A large round apple cut exactly into two equal halves. 2) A square sandwich cut into four equal quarters. 3) A circular pizza cut into four equal slices. The outlines are bold and clear with dashed lines showing the division of the shapes. Max is smiling and holding a basket. The background shows a simple park scene with a tree and some flowers.

Steps:

1. Label the half of the apple with the fraction $\frac{1}{2}$.
2. Label one piece of the square sandwich with the fraction $\frac{1}{4}$.
