

Max's Geometry Flashcards

Learning objective: To identify and describe the properties of 2D shapes and angles.

Max the monkey has made these flashcards to help you learn about shapes and angles. Read the front of the card, then check the answer on the back! Use the word bank to help you.

What is an angle less than 90 degrees called?

Acute angle

What is an angle greater than 90 degrees but less than 180 degrees called?

Obtuse angle

What is a 90-degree angle called?

Right angle

What do we call a shape with four straight sides?

Quadrilateral

What is the corner point where two lines meet?

Vertex

What do we call lines that stay the same distance apart and never meet?

Parallel lines

What do we call lines that meet at a right angle?

Perpendicular lines

What is a closed 2D shape with straight sides called?

Polygon

Which line goes side-to-side like the horizon?

Horizontal line

Which line goes straight up and down?

Vertical line

How many sides does a pentagon have?

5 sides

How many sides does a hexagon have?

6 sides
