

Max's Spooky Shop Maths

Learning objective: To practise counting and simple addition using a festive Halloween theme.

Help Max the monkey count the items in his shop! Colour in the spooky treats and write the numbers in the boxes provided.

Colour this: A friendly illustration featuring Max the monkey wearing a small party hat, standing behind a wooden shop counter. On the counter, there are 3 large, round pumpkins with simple carved faces and 3 tall, pointy witch hats. Next to the items, draw small empty squares for children to write their answers in. The background shows a simple autumn scene with a few falling leaves and a smiling crescent moon in the sky. All lines should be thick and clear for colouring.

Steps:

1. Count the 3 pumpkins and write the number here:
2. Max has 2 spooky hats. If he finds 1 more, how many hats does he have altogether?
