

Meet the Composers with Max the Monkey

Step into the world of musical masters with Max!

- A composer is a person who creates or writes their own pieces of music.
- Composers use musical notation to write down their ideas so other musicians can play them.
- A written collection of music for all the instruments in a group is called a score.
- Composers think about the melody, which is the main tune that you might hum along to.
- Rhythm is the pattern of long and short sounds that keep the music moving forward.

Did you know? Did you know that some composers write music for entire films? They use different sounds to help us feel happy, sad, or excited when we watch the action on screen!
