

Max's Musical Orchestra

Join Max the Monkey as he explores the wonderful world of sound!

- **String instruments make sound when you pluck or bow a tight string, like a violin or guitar.**
- **Woodwind instruments make sound when you blow air across an opening or through a reed, like a flute or clarinet.**
- **Brass instruments are made of metal and make sound by buzzing your lips into a mouthpiece, like a trumpet or trombone.**
- **Percussion instruments make sound when you hit, shake, or scrape them, like a drum or a tambourine.**
- **An orchestra is a large group of musicians who play many different instruments together in harmony.**

Did you know? Did you know? The largest instrument in the orchestra is the double bass. It is taller than most grown-ups and has very deep, rumbling strings!
