

Max's Magical Rhythm Guide

Feel the beat and find your rhythm with Max the Monkey!

- The pulse is the steady beat you feel in music, like the ticking of a clock.
- Rhythm is made by mixing long and short sounds together in a pattern.
- Tempo tells us how fast or slow the music should go.
- You can create rhythm by clapping your hands or tapping your feet.
- Music patterns repeat to help our ears follow the song easily.

Did you know? Did you know? Rhythm is like a heartbeat for music! Just like your heart keeps a steady beat when you run, rhythm keeps a song moving along in time.
