

Nova's Material Match-Up Flashcards

Learning objective: To identify and describe the properties of everyday materials.

Read the front of the card. Think about the material. Flip the card over to see if you are right! Use the word bank if you get stuck.

How do you describe a material that lets light pass through it?	How do you describe a material that does not let any light through?
Transparent	Opaque
What do we call a material that can bend easily without breaking?	What do we call a material that is stiff and does not bend?
Flexible	Rigid
What do we call a material that soaks up water like a sponge?	What do we call a material that stops water from getting through?
Absorbent	Waterproof
How do you describe a material that is attracted to a magnet?	What word describes a material that is difficult to scratch or dent?
Magnetic	Hard
What word describes a material that is easy to squash or shape?	How do you describe a material that reflects light and looks bright?
Soft	Shiny
