

Nova's Springtime Science Discovery

Learning objective: To describe the life cycle and changes in nature during the spring season.

Use the prompts below to write about what happens in spring. Use the word bank to help you write full sentences. Remember to use capital letters and full stops.

Spring is a wonderful time of year when nature begins to wake up from the cold winter.

Word bank: first · next · then · finally · because · sunlight · growth · warmth · blossom · hatch

1. What happens to the weather in spring? Start your sentence with: In spring, the weather... (2 marks)

2. What do you see happening to the plants? Start your sentence with: I can see the plants... (2 marks)

3. What are the animals doing? Start your sentence with: Many animals are now... (2 marks)

4. Why is spring important for life? Start your sentence with: Spring is important because... (2 marks)

Extension challenge: Can you draw a picture of your favourite spring flower or animal and label it with two science facts?
