

Kit's Guide to Being a Digital Superhero!

Click with Care and Surf with Smartness!

- **Keep your personal information private:** Never share your address, school name, or phone number with anyone you meet online.
- **Create strong, secret passwords:** Use a mix of letters, numbers, and symbols, and never share them with anyone except your parents or guardians.
- **Be a digital friend:** If you wouldn't say it to someone's face, don't type it online. Treat others with the same respect you want to receive.
- **Check with a trusted adult:** If you see something that makes you feel worried, sad, or confused, stop using the device and tell an adult immediately.
- **Think before you click:** Not every link or pop-up is safe. If a game or website asks for your name or money, always check with an adult first.

Did you know? Did you know? Every time you mail a photo, play a game, or leave a comment online, you are building your 'Digital Footprint.' Just like footprints in the sand, these can be seen by others long after you have moved on, so always make sure your digital trail is kind and positive!

Key vocabulary: Password · Privacy · Cyberbullying · Digital footprint · Personal data · Secure
