

Discovering Africa with Finn the Dolphin

Dive deep into the wonders of the second-largest continent on Earth!

- Africa is a vast continent divided into five distinct regions: North, South, East, West, and Central Africa.
- The Sahara, located in the north, is the largest hot desert in the world, covering an area similar in size to the entire United States.
- The Equator runs directly through the center of Africa, meaning many parts of the continent experience warm temperatures all year round.
- Africa's landscape is incredibly diverse, ranging from the snow-capped peaks of Mount Kilimanjaro to the sprawling grasslands of the Serengeti.
- There are 54 sovereign countries in Africa, each with unique cultures, languages, and histories.

Did you know? Did you know? Africa is home to the Nile, which is often considered the longest river in the world. It flows northwards for over 4,000 miles, providing water to many different countries before reaching the Mediterranean Sea!
