

Exploring Magnificent Asia with Finn the Dolphin

Pack your bags and dive into the world's largest continent!

- Asia is the largest continent on Earth and is home to the Himalayas, the highest mountain range in the world.
- The continent is surrounded by three major oceans: the Arctic Ocean to the north, the Indian Ocean to the south, and the Pacific Ocean to the east.
- Asia has a huge variety of landscapes, including vast deserts like the Gobi, and dense rainforests in Southeast Asia.
- Many of the world's longest rivers, such as the Yangtze and the Ganges, flow through Asia, providing water for millions of people.
- Asia is home to more people than any other continent, with a diverse mix of languages, cultures, and traditions.

Did you know? Did you know? Asia is so massive that it covers about one-third of all the land on Earth! Because it is so big, it has every type of climate, from the frozen, snowy plains of the north to the warm, tropical rainforests near the Equator.
