Finn’s Amazing World: Our Planet Home

Come along with Finn the dolphin as we explore the wonderful places on our Earth!

- **Physical features are things that happen in nature, like tall mountains, flowing rivers, and deep blue seas.**
- **Human features are things that people have made, such as houses, schools, and busy roads.**
- **You can find physical features in the countryside, away from big towns and cities.**
- **Human features change our world by creating places for people to live, work, and play.**
- **A park is a special place where we can see both: the green grass is physical, but the wooden bench is human!**

> *Did you know? Did you know? Physical features like mountains and oceans were made by nature, but human features like shops, houses, and bridges were built by people!*
