

Finn's Polar Adventure

Learning objective: To identify and describe features of the polar regions and recognize animals that live in cold climates.

Welcome to the Arctic! Look at the picture of Finn the dolphin visiting his cold-water friends. Use your favorite colors to bring the icy scene to life. Remember to color the icebergs white or light blue, and the sea a deep, chilly blue.

Colour this: A large, friendly-looking iceberg floating in the sea. Finn the dolphin is poking his head out of the water near the iceberg. On top of the iceberg, a fluffy polar bear cub is sitting down, and a snowy owl is perched on a small icy peak. In the sky, there is a large, smiling sun. The scene should have thick, simple outlines suitable for 3-5 year olds to color comfortably.

Steps:

1. Label the iceberg in your picture.
2. Label the sea in your picture.
