

Finn's Rainforest Adventure

Learning objective: To identify and name key features of a rainforest environment, understanding that different plants and animals live in different habitats.

Finn the dolphin is exploring a river deep inside the rainforest! Use your pencils to draw the rainforest habitat. Look at the word bank to help you label your picture.

Draw: Draw a lush, vibrant rainforest scene. Include a wide, blue river winding through the center. Surround the river with very tall trees that reach the top of the page. Add large, waxy green leaves and small, bright, colorful flowers near the riverbank. Draw soft, blue raindrops falling from the top of the page to show it is a rainy day.

Label words: tall trees · river · bright flowers · rain · green leaves

Steps:

1. Step 1: Draw a big, winding river flowing through the middle of your page for Finn to swim in.
2. Step 2: Draw some very tall trees on the riverbanks. Why do trees grow so tall in the rainforest?
3. Step 3: Draw colorful flowers near the bottom of the trees.
4. Step 4: Draw some raindrops falling from the sky. Why is it important for it to rain in the rainforest?
5. Label your drawing using at least three words from the word bank.
